Special custom finishes (price on asking)

Decorated soundboard

Plain soundboard

The Big Blue 47

Modern and innovative, the Big Blue 47 offers remarkable possibilities. Its 47 strings are each equipped with a high-quality pick-up, which capture the vibrations cleanly and with no residual noise. The harp can also be connected to an effects rack, which allow sound processing in real time, and as required. The Big Blue is also a triple-faceted instrument: acoustic harp, amplified electric harp, and electroacoustic harp. It liberates musical creativity from all constraints, and opens up an infinite realm of expressive possibilities. The extended soundboard version – the "Big" Blue – has particularly fine acoustic sound, with a depth of timbre and projection practically identical to a traditional acoustic harp. The Blue Harp name has become a synonym for the electric harp, and is a standard term in all musical spheres, from jazz and variety, to the most avant-garde new music.
